-

MATHEMATICS

My Polygon Capture

Draw and cut various polygons in different sizes and colours to make your own art piece.

Definition of a Polygon:

A polygon is any 2-dimensional closed shape formed with straight lines. Triangles, quadrilaterals, pentagons, hexagons etc. are all examples of polygons.

Note : You cannot use any form of circle to create your piece of art. Can you reason it why?

SCIENCE

STAY HOME, STAY SAFE, NEW NORMAL, COVID 19, CORONA, ISOLATION, QUARANTINE

These are the words we are hearing since last few months.

PROJECT 1: COVID 19

Prepare a research report collecting following information:

1. Cause.
2. Why is it called pandemic?
3. Its mode of transmission.
4. Symptoms.
5. Preventive measures.
6. How can we boost up our immunity to fight against this disease?
 - Design a poster to make people aware of this disease.
 - Paste pictures and newspaper cuttings in project file. (If possible.)

PROJECT 2: Light and Shadows

- ♣ **Transparent Objects:** If you are able to see clearly through an object, it is allowing light to pass through it and is transparent. For example: Water, clear glass etc.
- ♣ **Opaque Objects:** If we cannot see through an object at all, it is an opaque object. For example: wooden door, wall.
- ♣ **Translucent Objects:** There are some objects through which we can see, but not very clearly. Such objects are known as translucent. For example: Butter paper, ground glass etc.

Take three different types of objects - one transparent, one translucent and one opaque. Take them out in the sunlight and observe their shadow. Note down your observations as -

S. No.	Material/ Object	Transparent/ Opaque/ Translucent	Shadow formed Yes/No	If shadow formed, is it dark/light?

From the above observations conclude which type of object/material forms which kind of shadow or not forms the shadow and why?

Both projects will be done in same scrap file/project file.

SOCIAL SCIENCE

Urban Livelihoods vs. Rural Livelihoods

1. The word 'livelihood' means the way people earn money (jobs/occupations). It has been heard for ages that the lifestyle varies between a city and village. Definitely there is a great difference in the lifestyle among people living in villages and cities. Neither of them is above one another, but definitely has their own advantages and disadvantages.

Research and find out the differences and similarities between the rural (villages) livelihood and urban (towns & cities) livelihood in India.

On an A4 sheet, draw a double bubble map (you may get creative) based on your findings.

2. Look at the picture above and identify the type of pollution. Also, as a responsible Kāsigan, on an A4 sheet draw a mind map demonstrating the ways through which you would combat pollution.
